

MARK DIONNIE BULINGIT

*Experienced WordPress Developer &
Cross-Platform App Developer*

markdionniebulingit.vercel.app

SUMMARY:

Experienced full-stack developer with over three years of proficiency in WordPress sites and Flutter for cross-platform app development, along with expertise in DevOps, Server Management and Web Hosting. Seeking to apply extensive experience in a dynamic work environment.

WORK EXPERIENCES:

EZY Outsourcing Hub

July 2020 – Present
Remote

Mid-Level Web Developer | July, 2021 - Present

- Successfully developed, managed, and troubleshoot 30+ local and international websites for different companies.
- Led the development of multiple WordPress websites from concept to launch, ensuring high-quality deliverables and client satisfaction.
- Provided technical support and training to clients, empowering them to manage their WordPress websites effectively.
- Demonstrated expertise in handling worst-case scenarios on servers and websites, including cleaning and recovering malware-infected and corrupted files.
- Proactively administered CPanel, demonstrating expertise in tasks like web hosting, domain management, email configuration, DNS records management, SSH and FTP access, and the implementation of robust security protocols.
- Leveraging my experience and familiarity with our company's workflow and internal tools, I provide valuable guidance and support to senior dev team members throughout their onboarding process.
- Utilized Flutter to design, develop, and deploy MVP applications for Web, Android and iOS platforms, meeting client specifications and delivering user-friendly apps.

Junior Web Developer | July, 2020 – July, 2021

- Responsible for managing and updating legacy websites, ensuring their seamless performance and relevance.
- Successfully undertook complex website migration tasks, transferring sites from ISPCONFIG to SiteGround and HostGator, overcoming challenges related to data integrity, server compatibility, and minimizing downtime.
